Dusavik Operational Base

Site Info

Full specification overleaf

Subsea 7's Dusavik base, in Stavanger city, Norway, has been in operation since March 2004. The base is designed and built specifically for vessel mobilisation activities, maintenance and storage of Subsea 7's equipment and to support Subsea 7 operational activities worldwide.

Fast Facts

- Maintenance, mobilisation/demobilisation and storage base for Subsea 7 operations.
- Supports the global Subsea 7 fleet and Offshore Resources (OR).
- Strategically located within close proximity to all required facilities.
- Developed over a decade to respond to operational requirements.
- Capable of supporting onshore operations such as spooling, heavy lifting and fabrication.

Dusavik Operational Base

Facilities

The buildings measure approximately 3,200m² and consists of an office, workshop, warehouse and a large 38,000m² asphalted yard which is adjacent to the quayside. An additional 11,000m² storage facility is available at Buøy for larger or long term storage of equipment.

Office

The office is located on the second floor in the main building and consists of three closed offices, three open landscape areas with a total of 24 work stations, two video conference rooms and a reception area.

Workshop

The workshop is approximately 1,200m² including an electrical and hydraulic workshop. There is also a large construction hall with a technical office located to the side and direct access to the yard.

It is equipped with two overhead cranes (10t and 20t), motorised cherry picker, cold saw, milling machine and a welding workshop to support a range of operations and challenges.

The workshop is manned by a team of competent and experienced personnel, qualified to perform mechanical, hydraulic and electrical work.

The workshop additionally consists of a painting section where the final touch up can be performed.

Warehouse

The warehouse is approximately 1,200m², where goods for all our vessels are received daily. Equipment and goods are stored either in the warehouse where there is a storage capacity of 1,000 pallets, or building 41 which has a storage capacity of 1,100 pallets. In addition to these two buildings there is a 1000m² storage tent with a capacity of 1,260 pallets.

In the warehouse there are two office facilities, 20t overhead crane, four forklifts for outdoor use (3t, 5t, 5t, 8t and 12t), and two electric forklifts for indoor use.

Personnel, forklifts and cranes are available 24 hours a day, if required.

Capabilities

Dusavik base supports operations in the North Sea, for the UK and Norwegian sector. It also supports Subsea 7's global operations including the storage and maintenance of equipment and project related materials.

With its variety of highly competent and experienced personnel, ranging from logistics personnel, warehouse technicians, portcall co-ordinators and HSEQ personnel, the base has a proven track record of safely delivering projects on time.

Transport links

Dusavik is located in a convenient and easily accessible business and residential district. It is a 10-15 minute drive by car from Stavanger City Centre.

The closest airport is Stavanger Airport Sola (taxi ride is approximately 20-30 minutes, and during rush hour up to 1 hour).

Car parking

Visitor parking is available onsite for 24 cars, motorcycles and bicycles. Car parking and building access for both Subsea 7 personnel and visitors is in the front of the main entrance and the east side of the main office building.
