

ROV FLEET

With over 150 Remotely Operated Vehicles (ROVs), Subsea 7 has one of the biggest and most advanced ROV fleets in the world, capable of working in ultra-deep waters up to 4,000 metres as well as a wide range of challenging subsea environments.

From observation class ROVs to purpose-built drill support vehicles and heavy-duty construction-class systems, Subsea 7 and its division i-Tech have an ROV fleet large and diverse enough to meet their clients' requirements anywhere in the world. Operations are supported by a global network of offices, supplying full engineering and project management services.

Work Class ROVs

- Construction / Survey / Drill Support / Inspection
- Depth rating up to 4,000m
- Horsepower up to 250Hp
- Dual Schilling manipulator fit
- Top-hat or garaged tether management systems, or free-swimming.
