

# Warri Globestar Yard

## Warri, Nigeria

The Warri yard has a total covered working area of over 10,000sqm and a diverse range of welding capabilities.

The Warri yard is rated as one of the best fabrication yards in Nigeria and is renowned for its quality of work. With a production facility of up to a million manhours per year, it can mobilise itself quickly and adapt readily to changing client requirements.

### Key points:

- 2000t Quay (25m x 15m)
- 2 smaller Quays rated at 1000t and 500t capacity
- Super duplex workshops of 1,200m<sup>2</sup>
- Total covered working area: 10,150m<sup>2</sup>
- Muller pipe cutting machine up to 24-inch Dia.
- 2 x Oxytom plate cutting machines (120mm - plasma capability)
- Plate rolling machine up to 76.2mm thick.
- Indoor lifting capacity up to 50t (2 x 25t overhead cranes)
- Outdoor lifting capacity: 6 Manitowoc cranes (2 x 3900, 4 x 4000, 2 x 4600) + 4 PPM cranes. Max capacity = 225t
- Welding capabilities: SAW, SMAW, TGAW, FCAW, etc

# Warri Globestar Yard

## SPECIFICATION

### Overview

The Warri Yard is located in Warri, Nigeria. Covering an area of about 22 hectares along the Warri river. It is able to deal with a range of work scopes and project requirements.

The yard has successfully produced in excess of 4,000t jackets, 4,000t of piles, 3,000t decks and 500t of process piping / other equipment.

### Fabrication Capabilities

During the course of the last 40 years, we have had the opportunity to study, engineer, produce and fabricate various types of offshore structures in our Warri yard.

This includes:

- Jacket structures
- Modules, decks and platform appurtenances
- Suction Piles
- Single Point Mooring Buoys
- Subsea modules (Manifolds, jumpers)
- Spools, double jointing, reeled pipe.

### Plant and Equipment

The Warri Yard is fully equipped with cutting machines, plate rolling machines and cranes, including both indoor and outdoor cranes.

### Local Content

Today, Globestar has a large pool of trained and skilled national labour and supervisors in Nigeria for all fabrication activities. This is a direct result of the company's many years of training and employment in the area.

Located between the Odion Itsekiri community and Igbudu (Urhobo) community, Globestar takes an active part in the economic and social development of the communities, through financing of equipment and maintenance of infrastructure
