

Dusavik Base

subsea 7

Subsea 7
Dusavik Base
Stavanger
Norway

Subsea 7's Dusavik base, close to Stavanger city, Norway, has been in operation since March 2004. The base is designed and built specifically for storage of Subsea 7's equipment and provides offshore operational support worldwide.

The base covers an area of approximately 50,000sq. metres.

Key points

- Maintenance, mobilisation/demobilisation and storage base for the North Sea operation
- Supports the global Offshore Resource group (OR)
- Located in The Oil Capital of Stavanger on the south west coast of Norway
- Purpose built for Subsea 7's operations
- Excellent road access via interstate highways

Dusavik Base

Facilities

The buildings measures 3,750m² and consists of office, workshop, warehouse and a large 50,000m² asphalted yard which is next to the quayside.

Office

The office is located on 2nd floor and consists of one closed office, an open plan area for 15 work stations, conference room, video conference facilities, and reception area.

Workshop

The Workshop is approximately 1,000m², including Electronic and Hydraulic Workshop and a technical office, located side by side to the Warehouse, with access directly to the yard.

It is equipped with two overhead cranes (10 & 20 Te), and one motorised cherry picker with an 18m reach and a scissor lift with 8m reach.

The floor is reinforced with test pits and equipment for general mechanical work (welding, milling, lathing, washing, hydraulic jacking, and hydraulic testing) The workshop is manned by a team of competent and experienced personnel, qualified to perform mechanical, hydraulically and electrical work.

Warehouse

The main Warehouse is approximately 1,200m², and has pallet storage racks capacity for 1,000 pallets. A secondary Warehouse (Building 41) has the capacity of storing 1,100 pallets, and a Storage Tent with the capacity of storing 1,260 pallets. There is one office for Warehouse personnel, and one project office. It includes one 20 Te overhead crane, and four forklifts for outdoor use (3,5 Te, 5 Te, 8 Te and 12 Te), and two electric forklifts for indoors use. Personnel, forklifts and cranes are available 24hrs a day, as required.

Capabilities

Dusavik base supports operations in the North Sea, for the UK and Norwegian sector. It also supports Subsea 7's global operations including the storage and maintenance of equipment and project related materials.

With its variety of highly competent and experienced personnel, ranging from logistics personnel, warehouse technicians, portcall co-ordinators and HSEQ personnel, the base has a proven track record of safely delivering projects on time.

Transport links

Dusavik is located in a convenient and easily accessible business and residential district. It is a 10-15 minute drive by car from Stavanger City Centre. The closest airport is Stavanger Airport Sola (taxi ride is approximately 20-30 minutes, and during rush hour up to 1 hour).

Car parking:

Visitor parking is available onsite for 24 cars, motorcycles and bicycles. Car parking and building access for both Subsea 7 personnel and visitors is in the front of the main entrance and the east side of the main office building.
