BP AGT Inspection, Repair and Maintenance

Project at a glance

Five year service agreement awarded to i-Tech Services to provide a dedicated support vessel for the AGT region. This vessel, complete with work class and observation class ROVs provides inspection, repair and maintenance services.

Scope of Work

This scope will provide a Life of Field vessel and ROVs capable of performing inspection, survey, intervention, light subsea construction, surface diving and emergency response services.

The vessel is being supported by a Baku, Azerbaijan based onshore project management and engineering team, with additional specialist support services being provided from i-Tech Services operations centre in Aberdeen.
