

Full service across the field lifecycle

Subsea 7 provides project management, engineering and construction expertise across the full field lifecycle. These services are delivered within three operational business units: SURF and Conventional, Life of Field, and Renewables and Heavy Lifting.

CONCEPT	DESIGN	ENGINEER	PROCURE AND FABRICATE	INSTALL AND COMMISSION	MAINTAIN	EXTEND	DECOMMISSION
Input at concept allows for optimisation of later cycle stages.	Robust FEED ensuring minimal change and accurate forecasting during design.	Detailed engineering by experienced personnel to deliver the best solution.	Efficient procurement and high quality fabrication delivered on time.	Safe, on-schedule and cost-efficient installations by world class vessels.	Effective and responsive maintenance reducing cost of ownership.	Maximise return on investment by utilising new technologies to extend the life of the field development.	Facilitate abandonment, decommissioning and re-use of infrastructure.

What we do							
Being involved at the earliest stage of the field development enables us to deliver maximum value. The concept stage is key to lowering costs in the later lifecycle stages	We deliver Front End Engineering Design (FEED) for our clients. These services are essential in selecting the right solution to fully optimise the development.	Engineering is at the core of what we do. Detailed engineering involves taking the initial solutions developed in the concept and FEED stage and refining these for field execution.	Our teams are able to execute the largest EPIC projects in the market, in all our business units and in all geographies. Our ability to procure and fabricate effectively on a large scale differentiates us.	We install and commission subsea energy developments in all water depths across all energy hubs.	We specialise in maintaining offshore field developments through our services and expertise delivered through our Life of Field business unit.	We invest in technology that enables our clients to extend the life of their assets through enhancement of current production or additional production.	We have the capacity to undertake large-scale infrastructure abandonments.

How we add value							
We incorporate new technologies, fit for purpose solutions and standardisation into the concept design to lower the total cost of development.	We work with our alliance and client partners to optimise solutions, align schedules and accurately forecast full lifecycle costs.	Our global teams of experts have a track record for designing the best solutions and executing them. This stems from our ability to solve problems and engineer solutions.	We have a clear understanding of the risks and opportunities that exist when working with a large supply chain network.	Our fleet of high specification vessels allows us to install market-leading solutions. Our onshore and offshore experts have the experience to deliver these solutions safely and efficiently.	We incorporate our maintenance knowledge services into the design of the field, lowering the total cost of ownership for our clients.	Our technology portfolio offers a range of solutions for all field extension needs; we collaborate with partners across the supply chain to deliver these solutions.	We can manage all aspects of decommissioning projects including: regulation, technology, environment, planning, execution and costs.

Creating better outcomes for our stakeholders							
Our clients Our collaborative way of working helps us to develop the best solutions for our clients' needs. We are able to lower our clients' costs by utilising our technology, our assets and efficient work processes. Our culture ensures good performance without compromising safety.		Our shareholders We seek to create long-term value for our shareholders in all that we do. We have the right solutions to maintain a market-leading position. We have a disciplined approach to capital allocation and a commitment to good governance.		Our people Our people are the foundation of our business. Our experts, onshore and offshore, can deliver solutions around the world, leading the industry in know-how and the ability to innovate. We invest in our people, giving them opportunities to learn and grow.		Society We engage with the societies we work in. Through local partnerships we create and develop local content opportunities, and contribute to the communities in which we work. With Integrity as a Value we have a zero tolerance attitude toward non-compliant business practices.	
125 clients worked with Subsea 7 in 2019	265 meetings between Subsea 7 and investors in 2019	73 engineering graduates completed development schemes in 2019	65 community assistance events delivered in 2019
